Objective

Trained and passionate frontend developer skilled in HTML, CSS, JavaScript, React, and Python. Eager to contribute to real-world projects and deliver clean, responsive, and user-friendly web applications. Actively seeking freelance or junior developer opportunities to apply and grow my skills.

Technical Skills

- Frontend: HTML5, CSS3, JavaScript (ES6+), React, Tailwind CSS
- Backend: Basic Python
- Tools: VS Code, Chrome Dev Tools
- Other: Responsive Design, REST APIs, Figma to Code Conversion
- Data Analysis: Python (Pandas, NumPy), Excel, Power BI, SQL, Tableau, Jupiter Notebooks, Data Visualization (Matplotlib, Seaborn)

Projects

- **E-commerce Store (React + CSS)**
- Live: **https://tinyurl.com/23tvqaaz**
- - Built a fully responsive frontend e-commerce website with product pages, cart, and filtering.

- - Used React state management and component-based design.

Blog Website:

Live**:** https://tinyurl.com/2agj5e9m

- Created a dynamic and responsive blog website using HTML, CSS, and JavaScript.

- - Included categories, post pages, and a comment section.

Fashion Website

Live: https://tinyurl.com/24rquw9v

- Developed a sleek landing page for a fashion brand using HTML, CSS, and animations.

- - Responsive design for mobile and desktop screens.
-

• Sales Dashboard (Python + Chart.js)

- - Used Python to process sales data and visualize trends via interactive charts.
- - Frontend built with HTML/CSS and JavaScript integration.
